

## Systems-Wide **ENERGY SAVINGS**

**Panels with Increased  
R Value + Strip Doors + Refrigeration = Energy Savings**

### Heathcraft Systems

- Beacon II System: Intelligent technology that continually monitors system and Smart Defrost/ Demand Defrost
- Orbus lowers the operating pressures via variable speed condensing fan motors

### Low Profile Evaporator

- Mounted parts reduces the risk of parts getting lost in shipment and makes installation easier
- Electronic expansion valves, pressure transducer, temperature sensors
- EC Motors
- Easy access through front access panel
- All electrical components are factory wired to the terminal board and identified, making it easy to field wire the unit

**Low Profile**

### Center-Mount Evaporator

- Moves air across the ceiling in both directions
- Panels on ends removable for complete access to refrigerant components and electrical terminal block
- High efficiency aluminum fins
- Double drain pan eliminates drain pan sweating
- Tapered mounting provides proper slope for condensate drainage
- Electronic expansion valves, pressure transducer, temperature sensors
- EC Motors

**Center Mount**
