

ADDITIONAL FOUR-YEAR WARRANTY
On Motor-Compressor Assembly Only

Subject to the conditions herein set forth, Imperial-Brown agrees, for four years following expiration of the standard compressor manufacturer's product warranty, to reimburse to the original purchaser-user, named above, the difference between the fair exchange value of a motor-compressor assembly or any part(s) thereof (as defined below) which upon request to the nearest compressor wholesaler for inspection is found to be defective in material or factory workmanship under normal use and service, and the cost of replacement motor-compressor assembly, or replacement part(s), exclusive however of all freight, labor repair or other expense in connection with such exchange or replacement.

A motor-compressor assembly consists of the rotor, eccentric rod, piston, wrist pin, suction valve, discharge valve and the housing in which these parts are enclosed. In no event does this warranty include electric controls such as relays, capacitors, pressure control or fan and motor assembly, etc., nor the condenser, receiver and connecting tubing. This warranty does not include labor charges incidental to the replacement of parts, nor labor charges to remove or reassemble the motor-compressor assembly at premises of the purchaser-user. It further does not include any equipment to which said motor-compressor assembly is connected, such as cooling coils, temperature controls, refrigerant, metering devices, etc.
