Walk-in Coolers & Freezers For Schools & Health Care Facilities

Imperial Brown has three strategically located manufacturing facilities on the East Coast, the West Coast and in the interior of the U.S. These locations ensure quick delivery time for products and cut shipping costs for our customers.

Integrity. Service. Excellence.

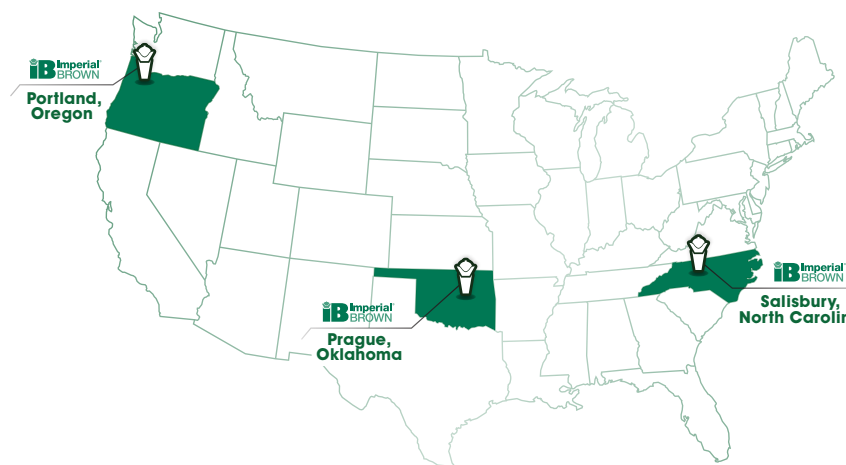

< Custom Design at Standard Price Point

Smart Systems

- We build to your specifications so that you don't have to accept nominal sizes
- Optimizes shelving space and layout
- Environmentally friendly foamed-in-place polyurethane construction provides the highest insulating values in the country. Wall thickness is available in 4, 5, and 6 inches for greater R-value.
- High-density structural rails within the floors provide the greatest support for performance and integrity over the life of the walk-in unit. A custom floor can be designed that will work for your particular application whether it supports foot, hand-trucks and carts, pallet jacks or extreme load traffic.

- Framed ceiling panels spanning greater than 19 feet and up to 25 feet without interior posts or beams, or overhead tie-ins, are ideal for larger warehouse solutions.
- Customize any size door opening size and location. All with strip/curtains or clear vinyl doors or sliders. Energy conservation, complete visibility and accessibility are always maintained.

Per EPA ruling regarding HFC refrigerants, R-404A and R-507A will no longer be permitted effective January 1, 2018. Imperial Brown will utilize acceptable refrigerants (R-407A/C/F, R-448A /R-449A) and be fully compliant with EPA regulations.
